

8X4 Pig/Goat Transport Truck

Van Body

Material	The box body is designed with a fully enclosed structural frame and inside made of anti-corrosion and anti-slip aluminum alloy with light and strong mass High degree, strong corrosion resistance, 60-80 degree high temperature disinfection	
Van size	(L x W x H)	9350mm x 2400mm x 2540mm
Van structure	3 Layer,Side window can be opened and closed	
Loading Area	21.25m3X3	
Loading Capacity	<p>21.25X3X110PCS,125KG (3 Layers).The whole van body part is three layers and each layer is divided into four bars, which are separated from the bars by a partition, so as to prevent casualties caused by extrusion in the process of transportation of pigs/goats</p>  	
Floor height	850mm(3 layers)/620mm (4 layers)	
Reversible structural components	Middle aisle floor and roof	

Pig/Goat Loading method

Hydraulic lifting rear plate

Hydraulic tail plate

5m2,the inside of the tail plate is installed with folding guardrail

Cooling Method

Mist sprinkler/18 pcs.

Air conditioning unit and two heating units are installed. The air conditioning unit can be used to cool down the pigs in summer, and the heating unit can be used to heat the car body when the temperature is relatively low in winter, so as to ensure the pigs are always in a comfortable transportation environment.

连接尺寸: 1/2" (DN15)4分
工作压力: 2-4KG
流量: 140-280L/小时
喷洒范围: 5-6米
喷洒方向: 360°
产品材质: 全铜

Feeding system

Drinking nozzle/18 pcs

Control system

An operating box at the bottom of the left rear of the carriage, which is equipped with a system to operate the tail plate lifting and dropping. You can operate the tail plate lifting and dropping by pressing the button inside the box, and you can also operate the tail plate by wireless remote control or wired remote control. There are three operating modes for you to choose.

Right side door is installed on the front part of the van truck.Two electrical control boxes are inside the side door.One is an inverter, one is the operation box.The controlling of pigsty fan, light, drinking water spray and other switches are in the operating box.

<p>Water tank</p>	<p>The lower left side of the car body is installed with a large volume of clean water tank, mainly used for live pigs drinking water and spray cooling, stainless steel water tank, not easy to rust, good corrosion resistance, long service life.</p> 
<p>Sewage collect tank</p>	<p>All stainless steel sewage collection box can effectively avoid the discomfort caused by the spread of animal feces on the floor during transportation</p> 
<p>Light system</p>	<p>One light on each floor and one light at the end</p>
<p>Monitor system</p>	<p>One camera on each floor and one camera on the rear of the car</p> 
<p>Temperature monitoring</p>	<p>Three temperature probes and temperature display can display the</p>

temperature and humidity of each layer inside the van body. the date and time can be displayed below. The temperature and humidity can be monitored and adjusted at any time.

Ventilation system

Italian waterproof high power exhaust fan,4 pcs each layer and in total 12 pcs. Ventilation fans are installed on the left and right sides of the car, with each bar.

Right into left exhaust fan to ensure smooth air in the compartment.

Company Introduction:

Hubei ChengLi Special Automobile Co.,Ltd,one of branches of CLW group, which was appointed by the Development and Reform Committee of China. ChengLi is a professional company who deal in different kinds of special vehicles, trailers and construction machinery.

- Certificate: ASME, ISO, BV, SGS, CCC etc.
- More than 30 independents workshops for different trucks
- 1000 sets of equipment, 25 assemble lines.
- 8000 staffs including 300 senior engineers and technicians
- 800 kinds of trucks and semi-trailers covering different industry
- 20 years wholesale experience
- Export to 90 countries
- Cooperates with DONGFENG,SINOTRUCK,ISUZU,FOTON,FAW,BEIBEN,ETC

Welcome to visit Hubei Chengli Special Automobile Co., Ltd in Suizhou City,Hubei Province,China.The nearest airport is WUHAN TIANHE INTERNATIONAL AIRPORT.

Main Products:

1. Water Tank Truck
2. Insulation Truck and Milk Truck
3. Sewage Suction Truck
4. Garbage Truck
5. Man lift Truck/Aerial Platform Truck
6. Truck with Crane
7. Fuel Truck/Trailers
8. Chemical Truck
9. Bulk Cement Truck
10. Concrete Mixer Truck
11. Fire Truck
12. Dump Truck
13. Van Truck/Refrigerated Truck
14. Wrecker/Tow Truck
15. Flatbed Truck/Low Bed
16. Tractor
17. LPG Tank/Truck/Trailer/Skid Station
18. Road Sweeper/Cleaning Truck
19. Ambulance Trucks
20. LED Advertising Trucks
21. RV/Camper Trucks
22. Food Truck/Vender Truck
- 23. Trailers**
